- Tubes
- Test Tubes
- Micro Filter
- Pipeline Components
- Valves
- Vessels
- Stirrers
- Heat Exchangers
- Column Components
- Couplings
- Sight Glass
- Falling Film Absorber
- Anhydrous HCL Gas Generator
- Rotary Film Evaporators

Glassware Repairs

Cost Saving repair is the specialty of Gentry Scientific Glassblowing. If a part is made out of glass, it probably can be repaired. Better yet, it probably can be repaired for less than half the cost of replacing it. Gentry Scientific Glassblowing specializes in doing just that for laboratories of all sizes and needs. GSGb has the expertise to make your glassware as good as new at significant cost savings.

Save 50% of your replacement costs

To estimate your potential savings, find out how much you are spending each month in replacing broken glassware. It's probably more than you think. By implementing a repair program, you should save at least 50% of your current replacement costs.

Sending Broken Glassware

It's easy! Every time someone breaks a part, just have them put the pieces in a box for glassware to be repaired. When you have enough pieces, pack them well and ship them to us. When necessary, include a rough drawing or sketch as to how the item is to be repaired, noting all critical dimensions.

Upon receipt, we will notify you of the cost involved and with your approval, repair and return it to you within a 2 week period. On a rush job, we will have the part back within 48 hours.

When in doubt, send it in! Don't try to decide whether a piece can or can't be fixed. The chances are it can, and if it can't, we will just return it.

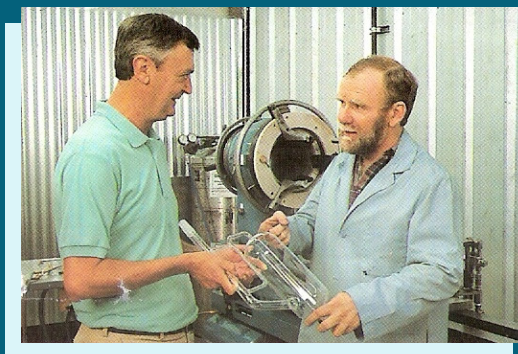

Money-Saving Glassware Tips

Once you implement your repair program, it must be kept in mind that if a part is made out of glass, it probably can be repaired.

Examples of the glassware that are commonly repairable but overlooked are given here:

**Separatory Funnels
Buret Tips
Graduated Cylinders
Chromatography Columns
Condensers
Flasks
Extractors**

Custom Fabrication

Tell us what you need and GSGb can design and fabricate it, to meet your special requirements with over 14 years of scientific glassblowing experience. GSGb has the expertise to provide your special glass apparatus.

Custom products are made out of high quality Borosilicate and Quartz materials with years of experience of Gentry Glassblowers that provides you with the utmost of accuracy and precision.

Design & Glass Tech Services

GSGb employees are among highly skilled Glass Technicians, Mechanical and Industrial Engineers, Engineering Designers and Drafters who can help you to invent and design new glass apparatus for your business needs.

Our employees are educated, experienced and skilled to operate various design and analysis software applications such as AutoCAD, Solidworks, Pro-Engineer so that you can have a piece of mind. All designs can be reviewed electronically before being finalized.

Off-the-shelf Glassware

Gentry can supply you with most commonly needed types of off-the-shelf glassware, including instrumentation glassware for —

- Perkin Elmer
- Carlo Erba
- Dohrman
- Antek
- Leco Corp and
- other elemental analyzers.
